4315 Imprinter

NBS electric imprinters are the ideal cost-effective solution. Whether it's at admissions, x-ray, emergency, intensive care, or nurse's stations, our electric imprinters are quick, easy to use and most of all, reliable.

The NBS 4340 & 4315 improve accuracy by imprinting all critical patient information on the required hospital forms. We realize how important it is to accurately record patient data and how demanding the hospital environment can be. We kept this in mind when designing this durable, yet quiet and quick efficient imprinter.

The 4340 & 4315 electric imprinters are extremely fast, taking less than one second to create a perfect impression, in turn, reducing time consuming hand writing. You will also find the "quick change" ink roller ensures minimal downtime and maintenance calls, so patients receive the best medical attention available with the proper paperwork.

Imprinters

Card Technology Corporation™

## FEATURES/BENEFITS

- Produces high quality, legible imprints
- Industry's smallest footprint
- Provides the largest imprint capacity
- Quick change ink roller to ensure minimal downtime
- Accepts virtually all multi-part formsets (up to .022" thick)
- Accepts all standard CR50 and CR80 cards
- An attractive and compact unit

## PRODUCT SPECIFICATIONS
